Investment Process

The process is both quantitative and qualitative with the latter dominating. The universe is screened for those high dividend stocks which have the greatest ability to sustain and grow their dividends over time. A particular emphasis is placed on identifying those companies with exceptional franchises, annuity like cash flows and pricing power which are trading at significant discounts to intrinsic value.

Dividend Dates

Dividends paid twice annually (January and July)

Fund Manager Commentary

The Fund performed well in absolute terms in April but lagged the even stronger performance of the Index. This was due to our low exposure to the tech sector, which rallied 32%, with Korea up 37% and Taiwan up 26%.

In contrast, the Philippines, Indonesia, and Thailand were flat or slightly down, as the high oil price raised fears that economic growth and inflation in these markets would be adversely affected. So far, the direct impact on our portfolio from the high oil price has been limited, but we will continue to monitor the situation should the war in Iran drag on for longer than anticipated.

There were no significant changes to the portfolio during the month. Valuations remain extremely attractive, with a P/E of just 8x and a dividend yield of 4.6%.
